

Kindly REJECT NAB's petition 04-160.

I PAY to listen to XM radio. I have had satellite radio since its inception I choose to buy XM because of gaps in the AM/FM radio coverage when one drives. I like to have (at MY fingers) weather and traffic data when I want it, not when some local station feels like broadcasting it and not HAVING TO HUNT FOR IT!

Good grief, this sounds like the AM vs FM fight I remember in the 60's
